Hold-A-Roll

A unique product patented by ITI WORLD INVESTMENT GROUP INC. and designed to hold two spare rolls of toilet paper at the side of your toilet tank. It is made from durable plastic with a lip portion which allows for a Hold-A-Roll to be easily hung on the side of a toilet tank, under the tank lid, for easy access and reliable support.

Hold-A-Roll is manufactured in British Columbia by subcontractors for ITI World Investment Group Inc. Increased manufacturing and product variations will be employed when funds become available to build a multi-cavity die. This will result in substantially higher profit margins and additional funds to proceed with product variations.

Product is currently being sold on a limited basis and negotiations are ongoing with distributors.

Variations of the Hold-A-Roll may include color schemes, patterns and alternate faux finishes (ie. metal, copper, brass)
